OptiFILL+®

INFILL FOR PLAYGROUNDS

Preferred Sands is a leading provider of high-quality coated sand infill solutions for the artificial turf industry. Preferred owns and operates a natural sand processing, coating and packaging plant in Genoa, Nebraska.

Preferred maintains control over the manufacturing process from start to finish when producing OptiFILL+, there are no outside or third parties involved.

RELIABLE LONGEVITY

OptiFILL+® provides a durable, low-maintenance solution that resists compaction, ensuring long-lasting, level surface with minimal grooming. It delivers consistent performance year-round, offering users a reliable playground in any season.

ANTIMICROBIAL PROTECTION

OptiFILL+® uses an optimized antimicrobial agent that inhibits the growth of bacteria, mold, and mildew on turf. This feature maintains a clean and healthy playing surface, reducing odors and the risk of infections, while sustaining a fresher playground over time.

MEETS OR EXCEEDS COMMON STANDARDS, SUCH AS G-MAX & HIC*

USER SAFETY

The consistent round shape and uniform size of OptiFILL+® particles provide a stable and cushioned surface, reducing the risk of injuries for users, meeting or exceeding common standards, such as G-max and HIC*.

ENVIRONMENTAL FRIENDLINESS

OptiFILL+® features a renewable bio-based coating that reduces fossil fuel use and is designed to be reusable and recyclable, making OptiFILL+® the environmentally responsible choice. Preferred will recycle any returned coated sand infill and provide a credit toward your next OptiFILL+® purchase.

ANTISTATIC FEATURE

OptiFILL+®'s advanced antistatic feature effectively reduces static buildup on the playground. This is especially beneficial in dry conditions, where static can become more pronounced, providing playground users with a more comfortable environment for play.
